

MU Type Optical In-Line Attenuators

Fig.1

■Features

1. Smaller package

Hirose's original design combines a plug and attenuator into the same connector size of a standard MU plug, and the superior design enable to save a space using 4.5 mm pitch MU multiple adapters as shown in Fig. 1 and 2.

2. Easy to Change attenuation level

Easy to change the attenuation level by exchanging the attenuator part with a simple push-twist lock as shown in Fig.3(See page 80). 15 levels of attenuation are currently available : 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 12.5, 15, 17.5, and 20 dB

3. Insertion and extraction tool

The MU standard tool is available as shown in Fig. 4.

4. Maximum input power :100mW

5. Please contact us if you have any requests. Hirose will offer excellent solutions to meet your requirements.

■Applications

Power level adjustment of optical fiber communication networks.

Save 16.7mm space

Product Specifications

Ratings	Operation temperature range	-25°C to +70°C	Storage temperature range	-25°C to +70°C
	Max. Input Power	100mW	Fiber type	SM

Item		Test Method	Specifications	
Optical Characteristics	Attenuation	Measurement at a point within the wavelength of 1310 ± 30 nm, and a point within the wavelength of 1550 ± 30 nm.	Attenuation Tolerance	
			0dB	≤0.5dB
			1,2dB	±0.5dB
			3,4,5,6dB	±0.8dB
			7,8,9dB	±1.0dB
			10dB	±1.2dB
			12.5,15,17.5,20dB	±ATT×10%dB
	Return Loss(R.L.)		≥40dB	
Mechanical Characteristics	Engagement and separation forces	Engagement and separation forces at 50mm/s.	Engagement force: ≤12.5 N Separation force: ≤12.5 N	
	Gauge retention force	Zirconia gauge at $\phi 1.249 \pm 0.0005$ mm.	1.0N to 2.5N	
	Mating durability	Insertion and extraction number for connectors:500 Insertion and extraction number for an attenuation element:50	1) Attenuation shall be satisfied after the test. 2) No breakage, crack or looseness on components.	
	Vibration	For 3 hours at an amplitude of 1.5mm. with the frequency range 10 to 55Hz. In each of three mutually perpendicular plane.		
Environmental Characteristics	Shock	3 times in each of three mutually perpendicular axis with the acceleration 981m/s ² .		
	Compassite Temperature-humidity	Humidity : 90% to 96%	No significant corrosion.	
	Cyclic test	Temperature : -10°C to 65°C, Cyclic : 10 cycles(240 hours)		
	Temperature cycling	Temp : 25→-25→-25→70→70→25°C Time : 15 30 30 30 15 min Cyclic : 10 cycles		
	Dry heat	Temperature : 85°C Time : 500 hours		
	Cold	Temperature : -25°C Time : 500 hours		
	Salt Mist	Salt Mist : 5% Time : 48 hours		

Materials

Part	Material
Body	Zinc alloy
Ferrule	Zirconia
Split sleeve	Zirconia

Back Cable Assembly (2mm diameter cable type)

The back cable assembly is supplied by Hirose.

Please contact your Hirose sales representative for details concerning your back cable needs, including cable length and mating connector requirements.

Ordering Information (Back cable assembly)

HMU - **PAT** **BH** **101** **K** **Q** - **L**
 ① ② ③ ④ ⑤ ⑥ ⑦

① Series Name HMU	⑤ Polishing type K: AdPC
② Indicates a in-line type attenuator	⑥ Fiber cable type(Note)
③ Indicate a back cable assembly	Q: SM-9.5/125, diameter 2mm Jacket color: Yellow
④ Mating connector (Note)	⑦ Cable length
011 : FC connector, 2 mm diameter cable	Unit: Meters
04G : SC connector, 2 mm diameter cable	
101 : MU connector, 2 mm diameter cable	

Note: These are examples of offered cable assemblies. They will differ depending on the applicable cable diameter and the type of boot. For exact cable assembly specifications, specify the connector type at the mating side and the required total length. Contact your Hirose Electric account representative.

◆ Procedure for Changing the Attenuator Element

Insertion Procedure

- 1 Align the triangle mark of the boot on the back cable assembly with the black indexing mark on the attenuator.

- 2 Insert the back cable assembly into the attenuator.

- 3 Turn right the back cable assembly to engage connection lock. After turning, the triangle mark of the boot will be aligned with the attenuation label.

Withdrawal Procedure

- 1 Press the back cable assembly toward the attenuator.

- 2 Turn right the back cable assembly and release the lock.

- 3 Pull away the back cable assembly.
